

THE NEW I-PACE

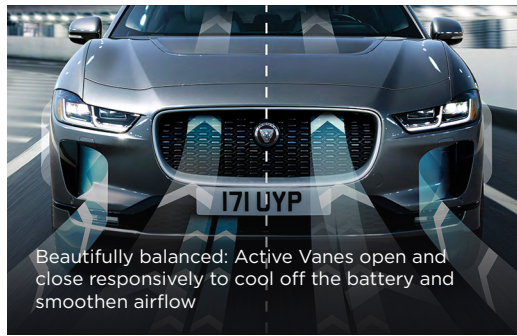

ALL-ELECTRIC, ALL-POWERFUL

The new I-PACE is the electrifying future of Jaguar – the culmination of eighty years' innovation, design and engineering that builds on art that never stops evolving and performance that never stops advancing. A pure battery electric vehicle (BEV) built from the ground up, its radical design conceals an exquisite interior with SUV levels of practicality. A sophisticated, all-electric powertrain provides high performance with zero tailpipe emissions. And, cutting-edge technologies work seamlessly with the car and with you. Thrilling to look at and drive, easy to live with, and connected like never before – don't wait to drive the world's smartest five-seater sports car now.

Aerodynamically designed: Elegant exterior with low drag coefficient of 0.29cD

Beautifully balanced: Active Vanes open and close responsively to cool off the battery and smoothen airflow

Intuitive and responsive: Pivi Pro Infotainment System with 11.4" touch screen

Action-oriented: Unconventional JaguarDrive transmission delivers sustainable acceleration from 0-12.000rpm with no lag and no gearshift interruptions

Spacious interior: Substantial 656 litres loadspace with a length of 967mm behind the rear seats, and 27 litres of additional storage beneath the bonnet

Efficiency redefined: Enhanced Brake Regeneration system recuperates all braking energy, converting the power generated to optimise the battery's range
